

# Stemformatics Workflow

1) Get raw  
data from  
GEO/SRA

2) Process  
raw data  
on  
HPC@NCI

3) QC checks  
done by  
domain  
informatics  
expert

4) QC fix eg.  
Batch  
correction

5) Upload to  
website

6) Curate data  
consistently  
across all  
datasets

7) Share data  
appropriately
